

## **Instrument taskgroup updates - joint meeting with ACTRIS and E-PROFILE**

PROBE subgroup meeting

Friday 26<sup>th</sup> May 2023, 9-12 CEST

The PROBE WG3/4 taskgroups are working in close collaboration with operational networks and research infrastructures. To enhance knowledge exchange with two of our most important partners, i.e. the European research infrastructure [ACTRIS](#) and the EUMETNET [E-PROFILE](#) programme, the following PROBE taskgroups are organising joint discussions with these networks:

- automatic lidars and ceilometers (ALC)
- Doppler wind lidars (DWL)
- microwave radiometers (MWR)
- Doppler cloud radars (DCR)

The joint taskgroup meetings are embedded in the [annual workshop of the ACTRIS Centre for Cloud Remote Sensing \(CCRES\)](#) and are open to anyone interested in these ground-based remote sensing technologies.
